Re: Notification of Additional Factory

Dear Valued Distributor Partner:

SL Power Electronics Corp. is pleased to announce that we are in the process of working with our manufacturing partner, BridgePower, to build an additional factory in Hanoi Vietnam due to growing demands for our products. We are very excited to announce the expansion of the BridgePower operations into a new facility with an improved layout to support our collective quality improvement efforts. We are providing you with advanced notice to ensure your needs are met with minimal disruption.

The new factory is currently operational and producing power supplies to other BridgePower customers. We now begin the second phase of the process by moving select SL Power products from the current factory to the new Vietnam location. The Component Vendor List remains unchanged as nearly all components continue to be sourced through the BridgePower Corporate office as is done currently.

Please take whatever steps necessary to provide notifications to your customers and advise if any will have any special needs (samples, etc). to ensure this transition moves smoothly with their internal qualification processes. To this end, SL Power recommends the following:

- Notify us if any of your customers require any internal qualification samples.
- Notify us if any of your customers will be requiring an on-site Quality Audit of the new facility.
- In the case of any internal qualification activities, provide advance purchase orders to minimize any risk of interruptions in the supply chain. Table A below lists the product families affected by the factory move.

The new BridgePower location will be located just outside of Hanoi, Vietnam.
The address is:

BridgePower VINA Co., Ltd.
Lot B09, Thuy Van Industrial Zone
Viet Tri City, Phu Tho Province, Vietnam

Please contact myself, your customer service representative or your sales representative for additional information on specific product requirements.

Thank you for your support as we move forward.

Best regards,

Ron Strauss
Quality Manager
