Subject: Product Change Notification Letter

Details of Change:

During the UL8750 Section SF3.1 update implemented on January 1, 2022 on Thomas Research Product drivers, the Vout range changed.

The Vout range changed from a minimum of 1/3 maximum Vf to max to a range of a minimum 1/2 maximum Vf to max.

(Ex: Maximum Vout of 48V: Prior to change this driver would have a 16-48V range but the after revision these are now 24-48V. These drivers are now classified as Rev F drivers.)

The following drivers are affected (note: -XX is replaced with either blank for regular drivers or -D for dimming versions):
