connecting tomorrow

Series C091A & B: Angled (90°) Cable Connectors.

With the change notification from 17.09.2007 we had announced that the base plate of the 90° angled cable connectors from the series C091A & B had been changed from a black varnish to a new semi gloss nickel plating.

Continuing the advancements of our products, we have now adopted the same finish for the housing as well, additionally giving these connectors with an improved surface plating also a fresh new look without changing any of the other existing technical features.

Reason: Product advancement; improved surface plating;

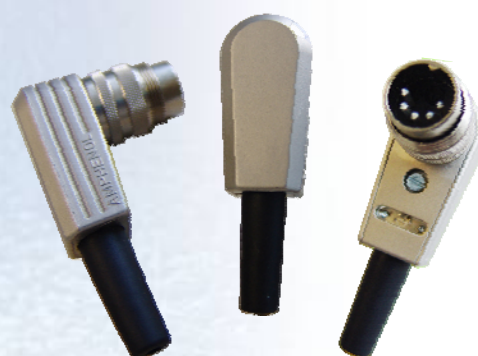

Concerned P/Ns: All male and female 90° angled cable connectors on pages 5, 8, 10, 19, 21 and 25 of the catalogue C091A/B/D Series Circular Connectors.

Schedule for implementation of this new design:
Effective immediately.

Change Notification 17.09.2007 (old design)

New design; entire housing with semi gloss nickel plating
