

Power strips used within a patient care vicinity may be permanently attached so that it can only be removed with a tool. Choose the PSCLAMP for a safe and secure mounting solution.

Safe-IT UL 60601-1 Medical-Grade Power Strip for Patient-Care Vicinity, 4 15A Hospital-Grade Outlets, Safety Covers, 15 ft. Cord

MODEL NUMBER: PS-415-HGULTRA

Full 60601-1 compliance, integrated locking safety covers and a 15 ft. cord make this medical-grade power strip ideal for all areas inside and outside of patient care vicinities.

Description

The PS-415-HGULTRA Medical-Grade Power Strip -- patent # 7,375,939 -- is the first power strip with full 60601-1 compliance and agency listing, making it ideal for standalone use in all patient care vicinities. This 120V, 50/60 Hz power strip features a NEMA 5-15P-HG hospital-grade plug and four NEMA 5-15R-HG hospital-grade outlets that include integrated locking safety covers.

A patented protection circuit guards against shock hazards by preventing power from reaching the unit's outlets in the presence of a fault. The protection circuit automatically resets itself and restores power once the fault threat is gone.

The power strip is protected by a antimicrobial powder coating. Antimicrobial protection helps prevent the growth of bacteria, viruses, fungi, mold and mildew. The coating meets the requirements of JIS Z 2801:2000, an international standard for evaluating efficacy in antimicrobial products. Mounting tabs and flanges let you install the PS-415-HGULTRA on a wide variety of surfaces. The all-

metal housing ensures safety and is guaranteed to last a long time in demanding environments. With a switchless design that prevents accidental shutoff and a 15-foot (4.57 m) power cord that can reach a distant power source, the PS-415-HGULTRA is a recommended replacement for all non-compliant power strips.
