

Product/Process Change Notice - PCN 17_0181 Rev. A

Analog Devices, Inc. Three Technology Way Norwood, Massachusetts 02062-9106

This notice is to inform you of a change that will be made to certain ADI products (see Appendix A) that you may have purchased in the last 2 years. **Any inquiries or requests with this PCN (additional data or samples) must be sent to ADI within 30 days of publication date.** ADI contact information is listed below.

Note: Revised fields are indicated by a red field name. See Appendix B for revision history.

PCN Title: Data Sheet Corrections for ADSP-2157x and ADSP-SC57x Products
Publication Date: 31-Jan-2018
Effectivity Date: 31-Jan-2018 *(the earliest date that a customer could expect to receive changed material)*

Revision Description:

Corrected the date of the Rev A datasheet release to be released by February 28, 2018.

Description Of Change

The following specification changes will be made to the Rev A Data Sheet:

- 1) Rev 0 page 18 of 142 "• 12-bit ADC core (10-bit accuracy) with built in sample and hold."
Rev A page 18 of 142 "• 12-bit ADC core with built in sample and hold."
- 2) Rev 0 page 62 of 142 Table 31 DD-Type_2575 0.50, DD-Peak_100 1.20
Rev A page 62 of 142 Table 31 DD-Type_2575 0.53, DD-Peak_100 1.27
- 3) Rev 0 page 64 of 142 Table 35 Offset error +-8, Offset error matching +-10
Rev A page 64 of 142 table 35 Offset error +-5, Offset error matching +-6
- 4) REV 0 - Pg 49 – Table 25- HADC0_VREFN "Desc: HADC0 Ground Reference for ADC Notes: Can be left floating if HADC and TMU are not used"
Rev A – Pg 50 – Table 25 - HDACO_VREFN "Desc: HADC0 Ground Reference for ADC, Notes: Connect to GND if HADC and TMU are not used"
- 5) Rev 0 (Table 25) Px_nn PORT pins and DAI0_PIN16 to 01 pins –"Notes: No notes"
Rev A- (Table 25) Px_nn PORT pins and DAI0_PIN16 to 01 pins –" Notes: See note2"
Note2 "Input by default. When unused, terminate externally in hardware or enable the internal pull-up resistor (when applicable) in software. When present, the internal pull-up design holds the internal path from the pins at the expected logic levels. To pull up the external pads to the expected logic levels, use external resistors."
- 6) Rev 0 (Table 25) Px_nn PORT pins and DAI0_PIN16 to 01 pins Internal Termination column is "PullDown"
Rev A (Table 25) Px_nn PORT pins and DAI0_PIN16 to 01 pins Internal Termination column is "Programmable PullUp 1" and note 1 is "Disabled by default."

Changes will be reflected in the Rev A datasheet, available by February 28, 2018.

Reason For Change

To better align with JEDEC JESD79 specifications and to more accurately represent the functionality of the product.

Impact of the change (positive or negative) on fit, form, function & reliability

Customers are advised to confirm these changes against their product designs. These changes are not expected to impact the fit, form,

function or reliability of the ADSP-2157x and ADSP-SC57x products.

Summary of Supporting Information

These corrections will be reflected in Rev A of the product Data Sheet available by February 28, 2018.

Supporting Documents None
