Product Change Notification

1. ECN #: 301413

2. Date of Announcement: June 08, 2017

3. Series:

- FTSH - .050" X .050 TERMINAL STRIP

4. Part #'s Affected

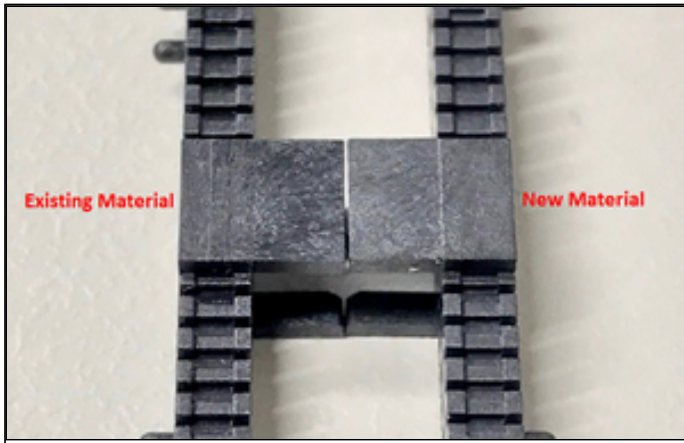

- FTSH-1XX-01-X-DV-K

5. Description of Change:

Updated design to the cut area of the body and material change from Vectra E130i to Vectra FIT30; both are high temp LCP. This is being released as a rolling change, which will allow for a possibility of mixed shipments during a limited time frame. The new design will fully replace the existing design once all existing stock material has been depleted.

6. Method of Identifying Change

Slight difference in shade/sheen of the material. Existing material has a slightly darker shade with more sheen.

7. Reason for Change:

New cut groove design and material change to lessen the creation of flash during the cut process. Updated design is required for new manufacturing technology being implemented by Samtec. The cut groove design change will not be noticed at the finished good level as it is removed during the cut process. The material change will also have no affect at the customer level as it is also a high-temp LCP with similar processing and temperature ratings as the current material being used.

8. Impact of Change on Form, Fit, or Function:

- Form - Slight visual shade/sheen of the material

9. Projected Implementation Date: July 08, 2017
