

Mono Enclosed Speaker with Plain Wires – 3W 4 Ohm

PRODUCT ID: 4445

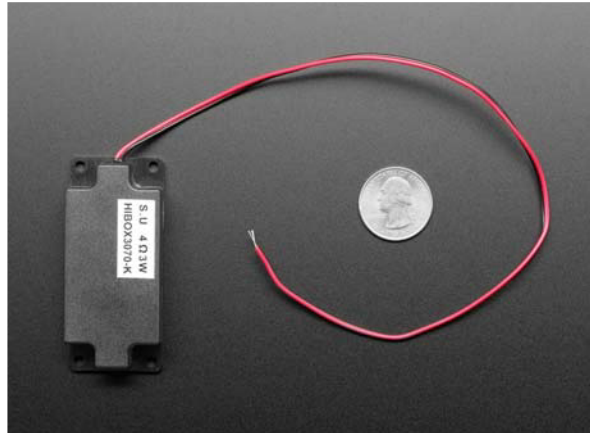

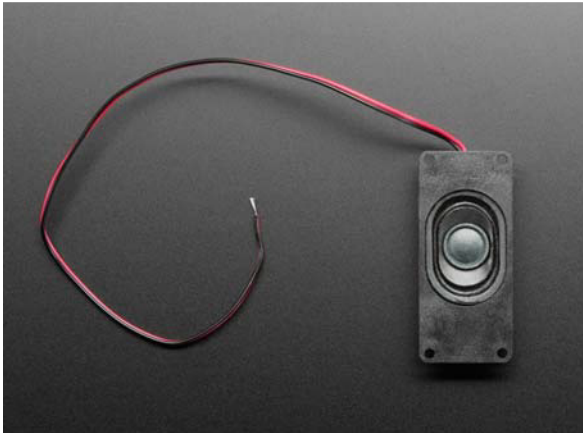

Listen up! This single 2.8" x 1.2" speaker is the perfect addition to any audio project where you need 4 ohm impedance and 3W or less of power. We particularly like these speakers as they are small and enclosed for good audio volume and quality. This speaker *does not* come with a connector on the end, it's just plain bare wires!

Works peachy-keen with any of our audio amps as well, such as the MAX98306, TS2012 or TPA2016 stereo class D amplifiers.

Note: This speaker does not have a connector on the end, but this one does!
