Follow Up: Notice of Product Discontinuance Conductive Inclinometer Products

Dear Customer,

This note is a follow up to a previous notification sent in March 2021 that TE Sensors is discontinuing the conductive inclinometer products that your company either purchased from us in the past or purchase as of today. Unfortunately, we have determined that we are not able to offer any Last Time Buy (LTB) orders for the discontinued part numbers. We have reviewed our open backlog and contractual obligations and we have no further capacity to produce additional volumes of the affected parts before the production location will close.

Please review the Product Termination Notice form included with this letter for a list of part numbers and models impacted by this change. While this list includes many different part numbers, it represents a small percentage of TE Sensors product portfolio, and we remain committed to providing our customers with a broad portfolio of leading sensor technologies and products.

We regret the inconvenience and impact this notice may cause. Please contact your local sales representative for any questions or comments.

Kind regards,

 TE Connectivity Sensors
