#### Dimensions:

##### DTE06:

2.09 x 1.34 x 1.04" (53.0 x 34.0 x 26.5 mm)

Available in two wide (4:1) input ranges for nominal 12/24VDC and 24/48VDC, the DTE06 series of encapsulated 6W DC-DC converters are chassis mount as standard or can be ordered with a DIN rail mount. They have screw terminals for ease of connection and an LED provides clear 'power good' indication. Remote On/Off is standard and when inhibited the standby current is just 2.5mA. Isolation is 3kVDC input/output providing excellent separation between supply and load. The modules are fully protected against input undervoltage, short circuit and overload conditions. These features, along with a rugged design and wide operating temperature range make the DTE06 series suitable for a variety of commercial and industrial applications.

### Notes

1. Input current measured at nominal input voltage.

2. Typical values.

3. For optional version fitted with DIN Clip add suffix '-D' e.g. DTE0624S24-D.

DIN Rail mounting clip is available as a separate item, order code DTE06 DIN CLIP.

4. Input current is typically 2.5mA at nominal input voltage when output is remotely turned off.

5. Per output.
