LF PCN# A0110 MINI/ATO Resistor Fuses: change of resistor supplier

November 1, 2016

Dear Valued Customer,

Littelfuse would like to notify you of the change of the supplier of our resistor component used in the MINI/ATO Resistor products from Vishay to KOA manufacturer. **This change is mandatory due to Vishay obsolescence of the components used in Littelfuse design and we have no access to additional Vishay resistors.** KOA components meet all Littelfuse quality and performance standards. No change is made to the design of the product, so the change of the supplier will not impact Form, Fit or Function of the material.

In the near future Littelfuse will introduce a new product design using different resin to upgrade thermal shock characteristics of the product.

Littelfuse will implement this change immediately as a running change, so you can expect to receive product with the KOA component immediately.

Impacted Materials

02400106P	Resistor - MINI 620 Ohm, 0.50W
02400107P	Resistor - MINI 121 Ohm, 0.50W
02400108P	Resistor - MINI 5100 Ohm, 0.25W
02400118P	Resistor - MINI 500 Ohm, 0.50W
02400105Z	Resistor - ATO 10k Ohm, 0.24W

Please contact your local Littelfuse representative if you have any additional questions. We will be pleased to answer any questions you may have. Thank you for your continued support.

Best Regards,

Aram Tamez
