LF PCN# A0080 Notification of Obsolescence of OHEV S-pack

May 5, 2015

Dear Valued Customer,

Littelfuse Inc. would like to notify you of the obsolescence of the small box packaging of our OHEVxxx.SXC and OHEVxxx.SXBD* series. The packaging of the 'S-pack' has proven to be insufficient to fully protect the product during shipment. The new packaging for these materials contains plastic trays which offer better protection during shipment and storage.

No change is made to the product. The only change is the packaging.

Littelfuse is currently in production on the replacement materials, so we can accept orders for the new materials immediately. We will continue to accept orders on the old packaging until **June 26 2015**, with a last ship date of **July 31, 2015**. After June 26 2015, Littelfuse will accept orders only for materials in the new packaging.
