OS-IN-2019-042

Optimization of Carrier Tape for Lx T66G (x=B,T)

QUALITY
FIRST

Reason for change

Reduction of pocket depth to improve position stability of device in tape.

Harmonisation of datasheet.

OS-IN-2019-042

Optimization of Carrier Tape for Lx T66G (x=B,T)

Description of change

The pocket depth will be reduced from 3,30mm to 3,15mm to reflect the change of the LED height, which was introduced with OS-PCN-2018-030-A.

Note: In current datasheet the pocket depth is stated as 3,65mm, which is a typo error.

For harmonisation of the datasheets of TOPLED Black family the pocket depth will be removed from the drawings.
