

Product Change Notice

To: All Concerned
From: Jose Ignacio Álava
Date: December 13th, 2021
No. of pages: 1
PCN-Ref. No.: PC-16 marking improvement

Please note that we are changing the PC-16 series marking for improved readability.

Impact marking will be replaced by laser marking starting from January 2022. The only change is the marking method, whereas the product, mechanical and electrical specifications as well as numbering logic remain the same.

Since some stock with impact marking might remain in the warehouse, mixed marking items may be delivered until this stock is finished.

PC-16 marking improvement

Old (impact) marking

New (laser) marking

Sincerely,

Jose Ignacio Álava

Engineering Director
