Subject Anaren Microwave Product Change Notice A2541Sep2016

Dear Customer,

Anaren would like to inform you that Anaren BLE module A2541XXXX20GX which you have purchased in the past preprogrammed with software licensed by Emmoco (EM-Ware) is no longer available from Anaren. The reason for this change is because Emmoco is no longer licensing the software to Anaren. If you still need Emmoco licensed software, please contact Emmoco directly.

Anaren will continue to supply the A2451 as a programmed device carrying only the standard TI BLE Stack. This part number is A2541XXXX10GX

Anaren does have an alternate module part number A20737XXX with a robust developer suite of software provided by Anaren.

For additional information please contact support@anaren.com regarding your immediate need for any projects which require modules with preprogrammed Emmoco software by 1 October 2015.
