Wednesday 9th July, 2014

Dear Customer,

Re: Obsolescence notification for Harwin product.

Please be advised that there are a number of ranges and individual items that are now obsolete. Some are with immediate effect, and some are with a last time buy date of 9th October, 2014. Please see the attached spreadsheet (that has 2 pages) for a complete list of affected items. The larger ranges that may be of most interest are:

- M20-960 and M20-961 series (2.54mm pitch extended pin headers)
- M22-265, M22-266, M22-267, M22-268 series (2mm pitch extended pin headers)
- S505 and S506 series

Unfortunately, we are no longer able to support these product lines. Alternative items are available in some cases; please see the attached spreadsheet for the alternative part numbers. In particular, identical pin headers to the obsolete standard extended ones can be supplied – by using the Pin Header Variant numbering. Details are in the spreadsheet.

If you have any further questions regarding this letter, please do not hesitate to contact us.

Yours faithfully,

The Product Management Team
