

November 2022

Ref: Product Discontinuation / End of Life Notice

Carlo Gavazzi recently introduced the IRC40 Inductive Sensors. This new series has been designed for accurate and reliable detection of actuating parts. With this high performing new offering, Carlo Gavazzi is announcing the phase out and discontinuation of the IC40, DC supply inductive sensors.

Please note the following dates:

- September 2022 – new IRC40 inductive family available with product in stock
- November 2022 – phase out and discontinuation announcement of IC40 DC supply sensors
- January 1, 2023 – pricing of the phased out IC40 part numbers will increase by 50%
- October 1, 2023 – last order date of phased out IC40 inductive part numbers

To ease this transition, several resources are available:

- Cross reference list from previous IC40 part numbers to new ICR40 part numbers (see below)
- ICR40 Brochure & Datasheets
- ICR40 sample – request from your sales rep
- Consultation – discuss with your sales rep the best way to move forward for your application

Our intent is to continue manufacturing and allow orders for the IC40 part numbers until October 1, 2023. Carlo Gavazzi is eager to assist you during this transition. While we regret any inconvenience this announcement may have caused, we are looking forward to continuing to support your sensing needs. Please contact us if you have any additional questions.

Sincerely,

Jill Oertel
