Date: Nov. 9, 2006

Subject: Planned obsolescence of Beau Eurostyle Series with ESE equivalents

Molex is obsoleting and will no longer supply the 32 series in the table below effective April 30, 2007.

These parts are replaced by the new ESE series of PCB Eurostyle terminal blocks, which have been shipping since June 2006.

ESE Eurostyle replacement parts are available for the series that will be obsoleted. The ESE series are listed in the table below.

The purpose of this effort is to free up capacity in the factory to manufacture other terminal block series and improve lead-times. The new ESE terminal blocks have lead-times of 9 weeks, and many standard part numbers are in stock.

Specific ESE replacement part numbers can be obtained in several ways.

1. ESE Brochure
2. Molex.com part number search
3. Distributor VIP System

Final orders must be entered no later than Dec. 29, 2006.

Pricing is subject to review.

Molex reserves the right to limit quantities on any orders placed.

The guideline for last-time buy orders is to not exceed last 6 months order quantity.

All orders are NCNR (no cancellations, no returns).

Thank you for your understanding and support.
