Product Discontinuation Notification

Inventus Power has decided to discontinue a select number of Elpac brand power supplies (see Exhibit A). These product discontinuations are being made as a result of discontinuation in the control chips that are used in these models as well as loss of sales volume in several of our older units. Recommended replacements have been provided where possible. We urge you to review specifications with your end customers to determine the suitability of the replacement product for their application. Datasheets can be found at <http://inventuspower.com/product/>.

In order to minimize product flow disruption, we will honor all existing open orders for the discontinued units and a last time purchase for these items can be placed. Purchase orders for last time buys must be received no later than September 1, 2017 and product(s) must ship before March 31, 2018.

We apologize for the inconvenience this decision may cause and will be happy to address any questions or concerns.

Sincerely,

Joe Redmond | Distribution Sales Manager

Inventus Power
