#### **Features**

#### **USB Cable Connects USB Type-A Peripherals to Your Computer**

This USB-A to USB-A cable is ideal for connecting high-speed USB 3.2 Gen 1 equipment, such as a patch bay or other USB peripherals, to your computer, laptop or other compatible device, such as a Chromebook or Microsoft Surface. Additionally, the U325-003 cable is recommended for use with Tripp Lite's U325-000-KP-BK, U325-000-KPA-BK and U325-001-KPA-BK USB couplers.

#### Supports USB 3.2 Gen 1 Speeds for a Faster, More Efficient Signal

The U325-003 supports USB 3.2 Gen 1 data transfer rates up to 5 Gbps—10 times faster than USB 2.0. Its bi-directional data interface allows data to flow both directions simultaneously, increasing theoretical bandwidth by 10 times for efficient power and little wait-time. The U325-003 is also backward compatible with previous USB generations, so you can continue to use legacy USB 2.0 and USB 1.1 peripherals.

Filtering EMI/RFI Line Noise and Eliminating Cable Strain Help Your Equipment Perform Better Foil and braid shielding blocks disruptive EMI (electromagnetic interference) and RFI (radio frequency interference) line noise that can disturb your electronics and inflict hardware damage or data loss. Integral strain relief gives the U325-006 extra flexibility, reduces stress and helps the cable move freely without cracking or breaking loose from the connector.
