*Phoenix Contact's factory has announced the following product(s) is going to be discontinued. Existing specifications will be met or exceeded. Technical support of the discontinued product will continue, as required. Please review and acknowledge this document and take the appropriate action with respect to your existing inventory and ordering replacement parts.*

#### Description for Product Discontinuation

Legacy EMpro energy meters (those with black housings) and their associated extension modules are being discontinued due to several factors, mainly due to the introduction of the all-new 2nd generation EMpro Energy Meters.

The legacy EMpro devices were offered in conjunction with a technology partner; the partner, in this case, has discontinued the enclosed part numbers on short notice, effectively ending our business relationship. As a result, we are only able to ship what products remain in our inventory here in the US and in our warehouse in Blomberg, Germany. This means that some parts may already be obsolete with no further orders being accepted or processed, effectively immediately. We apologize for any inconvenience this short notice may cause.

The recommended replacement meters exceed the technical capabilities of the legacy meters in almost every manner, including a greatly simplified user experience and an expanded range of available communications protocols. Additional versions and product range expansions are planned for the near-term future. As part of that plan, part number 2902352 (EEM-MA600-24DC) does have a designated replacement as well. The replacement, 1127052 (EEM-MA770-24DC), will be available for purchase in approximately two weeks.

More information about additional innovations and features of the new EMpro products may be found at [www.phoenixcontact.com/EMpro](http://www.phoenixcontact.com/EMpro).

#### Stock Status

Can existing stock still be used?
Is mixture of stock acceptable?

#### Transaction Dates
