Description: Have you run out of I/O pins? This great IC allows the user to expand up to 16 I/O using only two I/O for control! The PCF8575C is controlled through an I2C interface and features 16-bits of quasi-bidirectional input/output pins. Check out the datasheet for more info!

Dimensions: 1" x 1"

Features:

- 16 individually addressable pins
- Each pin configurable for input or output
- Interrupt output pin
