CY5670 CYSMART™ USB DONGLE

CY5670 CySmart USB dongle (BLE dongle) is a BLE-to-USB bridge that uses Cypress's PRoC™ BLE (CYBL10162-56LQXI) and PSoC® 5LP (CY8C5868LTI-LP039) devices. The dongle can be used with Cypress's CySmart™ Windows® tool to test and debug BLE devices. Visit www.cypress.com/BLE for more information on Cypress's BLE solutions.

PRoC BLE is a single-chip solution with a 48-MHz ARM® Cortex®-M0 CPU, BLE radio, CapSense® technology for touch sensing, two serial communication clocks (SCBs), a 12-bit ADC, four Timer/Counter/PWMs, four additional PWMs, I²S, and LCD.

The CySmart USB Dongle is factory-programmed to work as a BLE GAP Central device, allowing you to debug BLE applications such as those implemented using the CY8CKIT-042 BLE Pioneer Kit.

Detailed instructions for using the dongle with the CySmart tool are available as a part of the CySmart User guide. Visit www.cypress.com/CySmart

Note that the dongle firmware must be upgraded for use with other Cypress BLE kits. The kit specific firmware for the dongle can be found on: www.cypress.com/CY5670

Refer to the kit user guides on the website for detailed information.

CY5670 has been pre-compliance tested against regulatory standards for countries including USA (FCC), Canada (IC) and Japan (JRF/TELEC).
